Tank' Specification

<i>Description</i>			
Quantity of tanks and their respective size	200	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
	300	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
	400	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
	1000	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
	5000	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
	10000	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
	20000	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
	50000	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
	100000	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
	Other	m ³ _____ (ea), Diameter _____ (M), Height _____ (M)	
Roof type	Fixed <input type="checkbox"/>	Floating <input type="checkbox"/>	<input type="checkbox"/> Inner
Columns		Quantity _____ (ea) Columns Height _____ (M)	
Floor Type	Flat <input type="checkbox"/>	Sloped <input type="checkbox"/> Slope ____% <input type="checkbox"/> Cone down <input type="checkbox"/> Cone up	
Manholes	Quantity in the wall _____ (ea) Diameter _____ (M)	Quantity in the roof _____ (ea) Diameter _____ (M)	

Heating coils	Yes <input type="checkbox"/>	No <input type="checkbox"/>
Product		
Product holding in the tank	Crude Oil <input type="checkbox"/> Heavy fuel Oil <input type="checkbox"/> Diesel Other Petroleum products: _____ _____ _____	
Volume and composition of sludge	Approximate volume _____ (M ³)	Hydrocarbons _____% Water _____% Solids _____%

How tanks will be used after cleaning:

Same product holding _____;
 Change of holding product _____;
 Following repair works _____.

Utilities available:

Water _____;
 Sewer _____.

Expected composition after cleaning (% of weight.):

- **Hydrocarbon phase:** Hydrocarbon ____%; Water ____%, Solids ____%.
 - **Solid phase:** Hydrocarbon ____%; Water ____%, Solids ____%.
